SYNTHETIC SAFETY DATA SHEET

Example Radiance Serum Concentrate

Training fixture only. This document intentionally contains exact concentrations, ranges, bounds, an approximate value and an undisclosed quantity. It is not an official supplier SDS and must not be used for safety or regulatory decisions.

1. Product and supplier identification

Product name	Example Radiance Serum Concentrate
Recommended use	Cosmetic facial serum - demonstration sample
Supplier	Regulens Pilot Materials Pte. Ltd. (fictional)
Document date	1 November 2026

2. Document scope and completeness

Document type: SDS/MSDS or partial ingredient disclosure. The concentration table below is intentionally incomplete and may not represent the full product formula. Regulens should require the reviewer to confirm document completeness before screening.

3. Composition / information on ingredients

Ingredient / INCI	CAS No.	Concentration	Reported function
AQUA (WATER)	7732-18-5	60-80%	Solvent
GLYCERIN	56-81-5	5%	Humectant
NIACINAMIDE	98-92-0	Approximately 4%	Skin conditioning
PHENOXYETHANOL	122-99-6	0.5-1.2%	Preservative
PANTHENOL	81-13-0	<= 1%	Skin conditioning

Composition table continues on page 2.

SYNTHETIC SAFETY DATA SHEET

3. Composition / information on ingredients - continued

Ingredient / INCI	CAS No.	Concentration	Reported function
OCTOCRYLENE	6197-30-4	8-12%	UV filter
ZINC OXIDE	1314-13-2	Approximately 2%	UV filter; opacifying
CI 42090	3844-45-9	0.02%	Colourant
TOSYLCHLORAMIDE SODIUM	127-65-1	0.25%	Preservative
BENZENE	71-43-2	< 0.01%	Unavoidable trace impurity - not intentionally added
MYSTERY BOTANICAL BLEND	Not available	Not disclosed	Fragrance blend; composition undisclosed

4. Additional formulation information

Physical form	Liquid emulsion
Product use	Leave-on facial product
Preparation stage	Reported concentrations refer to the finished product
Intended users	General adult population
Application	Applied to facial skin; not intended as an aerosol or spray

5. Reviewer test notes

- Confirm that Regulens identifies this as an SDS/MSDS or partial disclosure rather than a complete formulation.
- Check page references and source snippets for ingredients from both pages.
- Verify that exact, bounded, upper-bound, approximate and unknown concentrations remain distinct.
- Review the 0.5-1.2% and 8-12% ranges conservatively where a regulatory maximum is applicable.
- Confirm that missing identity or concentration information is not invented.
- This document contains no regulatory conclusion; all screening decisions must come from Regulens' deterministic rules.
