Formulation Screening Report

Formulation ID	DEMO-01	**Formulation name**	Mixed finding coverage
Product context	Not supplied	**Jurisdiction**	Singapore
Screened at	22 Oct 2026, 11:23 UTC	**Screening reference**	sample-demo-01

Screening summary

13	6	4	2
Ingredients screened	Professional review flags	Adverse findings	Incomplete results

Ingredient screening results

Row	Ingredient	Concentration	Function	Screening result	Attention
1	Aminophylline	Not supplied	Not confirmed	Prohibited-list substance identified	Needs attention
2	Benzene	Not supplied	Not confirmed	Prohibited-list substance identified	Needs attention
3	Dioxane	Not supplied	Not confirmed	Prohibited-list substance identified	Needs attention
4	Tosylchloramide sodium	0.1 % (finished product)	Not confirmed	Restriction within limit	No
5	Tosylchloramide sodium	0.21 % (finished product)	Not confirmed	Restriction limit exceeded	Needs attention
6	Tosylchloramide sodium	Not supplied	Not confirmed	Information missing	Needs attention
7	Tosylchloramide sodium	0.1 % (ready for use)	Not confirmed	Professional review required	Needs attention
8	Diethylene glycol (except if it is present as an unavoidable trace amount up to a limit of 0.1% in the finished cosmetic product)	0.05 % (finished product)	Not confirmed	Professional review required	Needs attention
9	BHT	0.1 % (finished product)	Not confirmed	Professional review required	Needs attention
10	Aminophylline	Not supplied	Not confirmed	Professional review required	Needs attention
11	Aqua	Not supplied	Not confirmed	No issue identified within scoped rules	No
12	Mystery Extract	Not supplied	Not confirmed	Identity unresolved	Needs attention
13	Diethylene glycol	Not supplied	Not confirmed	Professional review required	Needs attention

Dataset traceability

Accepted dataset: **acd-2026-1__sg-2025-12-01__parts-i-v-r1**
Accepted baseline SHA-256: 7ddf5dd7f050710a788012982359107befd246995bf87c3a4cc4b2828a8c61ca
Identity catalogue: eu-glossary-2025-1175

Result details

Evidence and review notes for each submitted ingredient.

Row 1 - Aminophylline

Result	Prohibited-list substance identified
Submitted	Not supplied; CAS Not supplied
Identity	resolved
Attention	Needs attention

Review guidance: No additional professional-review guidance was generated.

Regulatory evidence: Third Schedule Part I reference A1136

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 2 - Benzene

Result	Prohibited-list substance identified
Submitted	Not supplied; CAS Not supplied
Identity	resolved
Attention	Needs attention

Review guidance: No additional professional-review guidance was generated.

Regulatory evidence: Third Schedule Part I reference 47

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 3 - Dioxane

Result	Prohibited-list substance identified
Submitted	Not supplied; CAS Not supplied
Identity	resolved
Attention	Needs attention

Review guidance: No additional professional-review guidance was generated.

Regulatory evidence: Third Schedule Part I reference 343

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 4 - Tosylchloramide sodium

Result	Restriction within limit
Submitted	0.1 % (finished product); CAS Not supplied
Identity	resolved
Attention	No

Review guidance: No additional professional-review guidance was generated.

Regulatory evidence: Third Schedule Part II reference 5

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 5 - Tosylchloramide sodium

Result	Restriction limit exceeded
Submitted	0.21 % (finished product); CAS Not supplied
Identity	resolved
Attention	Needs attention

Review guidance: No additional professional-review guidance was generated.

Regulatory evidence: Third Schedule Part II reference 5

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 6 - Tosylchloramide sodium

Result	Information missing
Submitted	Not supplied; CAS Not supplied
Identity	resolved
Attention	Needs attention

Review guidance: No additional professional-review guidance was generated.

Regulatory evidence: Third Schedule Part II reference 5

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 7 - Tosylchloramide sodium

Result	Professional review required
Submitted	0.1 % (ready for use); CAS Not supplied
Identity	resolved
Attention	Needs attention

Review guidance: Concentration stage needs confirmation: The submitted concentration is for one stage, but the rule applies at a different stage.

Regulatory evidence: Third Schedule Part II reference 5

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 8 - Diethylene glycol (except if it is present as an unavoidable trace amount up to a limit of 0.1% in the finished cosmetic product)

Result	Professional review required
Submitted	0.05 % (finished product); CAS Not supplied
Identity	resolved
Attention	Needs attention

Review guidance: Rule exception needs confirmation: This rule has an exception that still needs checking.

Regulatory evidence: Third Schedule Part I reference A1140

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 9 - BHT

Result	Professional review required
Submitted	0.1 % (finished product); CAS 128-37-0
Identity	review required
Attention	Needs attention

Review guidance: Name and CAS do not match: The ingredient name and CAS number do not point to the same ingredient.

Regulatory evidence: No matched executable rule.

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 10 - Aminophylline

Result	Professional review required
Submitted	Not supplied; CAS 128-37-0
Identity	review required
Attention	Needs attention

Review guidance: Name and CAS do not match: The ingredient name and CAS number do not point to the same ingredient.

Regulatory evidence: No matched executable rule.

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 11 - Aqua

Result	No issue identified within scoped rules
Submitted	Not supplied; CAS Not supplied
Identity	resolved
Attention	No

Review guidance: No additional professional-review guidance was generated.

Regulatory evidence: No matched executable rule.

Scope: The ingredient name is recognised in the EU Glossary of Common Ingredient Names. No matching entry was identified within the Singapore Third Schedule and ACD sections in the active accepted dataset. This does not establish ingredient safety, unrestricted use, or overall product compliance.

Row 12 - Mystery Extract

Result	Identity unresolved
Submitted	Not supplied; CAS Not supplied
Identity	unresolved
Attention	Needs attention

Review guidance: Ingredient identity needs confirmation: The ingredient name and CAS information do not clearly point to one source-backed ingredient.

Regulatory evidence: No matched executable rule.

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Row 13 - Diethylene glycol

Result	Professional review required
Submitted	Not supplied; CAS Not supplied
Identity	resolved
Attention	Needs attention

Review guidance: Rule exception needs confirmation: This rule has an exception that still needs checking.

Regulatory evidence: Third Schedule Part I reference A1140

Scope: This is an initial Singapore screening result within the implemented rules only; professional review remains required.

Important scope statement

This report records an initial Singapore formulation screening within the implemented accepted rules. It is not a product approval, safety assessment, label review, or complete compliance determination. Professional review remains necessary wherever identified and for requirements outside the screening scope.
